The information is required by law to help you understand the nature and the risks of investing in this UCITS. You are advised to read it so you can make an informed decision about whether to invest.

NATIXIS ACTIONS US GROWTH
ISIN code: FR0011010149 H-R (C) EUR unit
Management Company: Natixis Investment Managers International (BPCE Group)

OBJECTIVES AND INVESTMENT POLICY

- The objective of the UCITS is to outperform the S&P500 TR index in US dollars over the recommended minimum investment period of five years. This index is mainly composed of US large-capitalisation companies. It comprises about 500 equities. It is calculated with gross dividends reinvested.
- The Sub-Fund is actively managed. The Benchmark is used for comparison purposes only. The Delegated Investment Manager remains free to choose the stocks that make up the portfolio in accordance with the Sub-Fund's investment policy.
- The Benchmark can be used to determine the performance fee that will possibly be levied.
- The UCITS’ investment policy is based on the selection of companies with strong growth potential. Based on fundamental research, this selection relies on the identification of a sustainable competitive advantage (strategy analysis), a competitive (business prospects and profitability) and financial (published and forecasted results and balance sheets) analysis, a valuation analysis (trends in the share price components) and an assessment of the management of these companies.
- The AMF classification of this UCITS is: International equities.
- The UCITS shall invest at least 80% of its net assets in shares of North American companies. Its exposure to the equity market is between 90% and 105% of net assets. The major portion of the investments is focused on large and mid-cap stocks belonging to the index. All of the UCITS’ assets are exposed to the US dollar.
- In addition, the manager reserves the right to invest up to 10% of the UCITS’ assets via Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect programmes (jointly referred to as the “Stock Connect” programmes).
- As the portfolio’s reference currency is the US dollar and the unit value is denominated in euros, the fund manager always hedges against the currency risk arising from changes in the value of the US dollar with respect to the euro in order to limit the impact on the performance of the UCITS.
- The UCITS accumulates its income.
- Redemption requests are received every day by 3.30 p.m. at the latest and are executed daily.

The risk indicator reflects the UCITS’ exposure to the international equities market.

- The historical data used to calculate the level of risk may not provide a reliable indication of the UCITS’ future risk profile.
- The lowest category does not mean a risk-free investment.
- The risk category associated with this UCITS is not guaranteed and may change over time.
The charges and fees you pay are used to cover the running costs of the UCITS, including the costs of marketing and distributing units. These charges reduce the potential growth of your investment.

Ongoing charges are established on the previous accounting year’s figures, closed in September 2021. This figure may vary from one financial year to the next.

The ongoing charges do not include:

- performance fees.
- A performance fee may be charged even if the UCITS performs negatively, as long as its performance exceeds that of its benchmark.
- Intermediary charges, except in the case of entry and/or exit charges paid by the UCITS when it buys or sells units in another collective investment scheme.

For more information on charges, investors are advised to refer to the “Charges” section of the prospectus for this UCITS, available on the website www.im.natixis.com.

**Past Performance**

The performance graph shown here does not constitute a reliable indication of future performance.

Annual performance is calculated following the deduction of charges from the UCITS.

- Year the H-R (C) EUR unit was created: 2011.
- Currency: Euro.

The performance of the UCITS is not linked to the performance of the benchmark. The benchmark is to be used as a comparator.
